

Renewable Energy Certificates (RECs)

- **Renewable Energy Certificates (RECs)** are a form of electronic currency which can be created when you purchase and install a renewable energy system.
- A REC is awarded for every megawatt hour generated/abated by a system over a period of time.
- RECs can be created and traded between registered persons via the REC Registry.
- All Solar Industries products qualify for RECs which can reduce the cost of a Solar Industries Power system by up to thousands dollars or a Solar Hot Water System by up to \$1200. RECs are dependant on the area you live in, the model purchased and the market value of RECs when the system is installed.
- For more information about RECs, please visit Australia Government Website at <http://www.orer.gov.au/recs/>

Renewable Energy Certificates (RECs)

Electric Boost

<i>Number of RECS</i>	Zone 1	Zone 2	Zone 3	Zone 4
MODSOL2502CW	34	32	34	29
MODSOL3001CW	24	24	24	19
MODSOL3002CW	33	32	33	28
MODSOL4002CW	41	42	41	34

Gas Boost

<i>Number of RECS</i>	Zone 1	Zone 2	Zone 3	Zone 4
MODSOL2502CWNG/LPG	41	42	41	34
MODSOL3001CWNG/LPG	27	29	27	21
MODSOL3002CWNG/LPG	41	42	41	34
MODSOL4002CWNG/LPG	41	42	41	35
